PROFESSIONAL SUMMARY

Analytical and results-driven **Data Science & AI/ML Engineer** with a solid foundation in Computer Engineering, exploratory data analysis (EDA), and automated data preprocessing pipelines. Proficient in Python, SQL, and data visualization frameworks, with proven experience converting raw, unstructured datasets into reliable business insights and responsive applications. Adept at applying robust algorithmic logic, dataset optimization, and interactive dashboard creation to solve complex analytical problems.

TECHNICAL SKILLS

Data Science & Analytics:	NumPy, Pandas, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Preprocessing, Feature Engineering, Feature Imputation, Statistical Modeling
Programming Languages:	Python, Java, C, C++, PHP, SQL
Databases & Querying:	MySQL, Relational Database Management Systems (RDBMS)
Core CS Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Software Engineering
Web & Mobile Tools:	Android Studio (XML/Java), HTML5, CSS3, JavaScript, Salesforce Administration, Git/GitHub, MS Excel

ACADEMIC & PERSONAL PROJECTS

Netflix Data Visualization / *Python, Pandas, Matplotlib, Seaborn, EDA*

- Executed Exploratory Data Analysis (EDA) on 8,000+ records to extract streaming trends, genre distributions, and production shifts.
- Cleaned unstructured attributes (release year, rating, country), resolving missing values and boosting data consistency by 95%.
- Built visual dashboards using Seaborn and Matplotlib to analyze content strategy and the ratio shift between movies and TV shows.

Weather Dataset Cleaning & Analysis / *Python, Pandas, NumPy, Data Preprocessing*

- Engineered an end-to-end cleaning pipeline to systematically resolve missing values, duplicate entries, and climate metric anomalies.
- Standardized datetime attributes and unit conversions across heterogeneous inputs, accelerating downstream query speeds by 40%.
- Analyzed multi-variable environmental relationships including temperature fluctuations, humidity levels, and precipitation patterns.

Employee Dataset Cleaning & Analysis / *Python, Pandas, NumPy, Data Profiling*

- Applied statistical profiling algorithms to detect/correct salary anomalies, non-standardized titles, and null fields across multi-department data.
- Standardized categorical variables and implemented automated duplicate removal logic to ensure high data reliability for analytics.
- Evaluated organizational demographics, attrition metrics, and tenure patterns using customized group-by queries and aggregates.

Eco-fy – Sustainable Living Android App / *Android Studio, XML, Java, Mobile UI*

- Designed and built an interactive Android mobile application encouraging environmental sustainability and eco-friendly habit tracking.
- Developed modern UI layouts using native XML components to ensure smooth cross-screen rendering and optimal user navigation.
- Structured application logic and lightweight data models to maintain fast execution speeds and minimal resource overhead.

Fake News Headline Generator / *Python, Algorithmic Logic, CLI Development*

- Developed a dynamic text synthesis engine in Python using randomized generation logic and string manipulation algorithms.
- Structured state tracking and conditional branching to eliminate output duplication across generative text loops.
- Designed an interactive command-line interface (CLI) to allow real-time parameter handling and randomized topic generation.

Personal Portfolio Website / *HTML5, CSS3, JavaScript, Web Deployment*

- Architected and deployed a personal responsive web portfolio showcasing 6+ core technical projects, skills, and academic background.
- Optimized DOM rendering, image compression, and CSS layouts, reducing page load times and achieving cross-device responsiveness.

WORK EXPERIENCE

Salesforce Administrator Intern / *Salesforce*

Pune, Maharashtra

- Configured custom objects, validation rules, page layouts, and automated workflows to maintain system data accuracy.
- Managed user access controls, security profiles, and organization-wide data sharing rules to preserve enterprise database integrity.
- Generated custom reports and analytics dashboards to evaluate operational metrics and assist leadership with business tracking.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering

Suman Ramesh Tulsiani Technical Campus (SRTTC), Kamshet | Savitribai Phule Pune University (SPPU)

Diploma in Computer Engineering

Dr. D. Y. Patil Polytechnic, Ambi, Pune

STRENGTHS & LANGUAGES

Key Strengths: Analytical Problem Solving, Mathematical Modeling, Data Preprocessing Pipelines, Fast Learner & Adaptable to AI/ML Frameworks, Technical Communication.

Languages: English, Marathi, Hindi
